Summary

As a React frontend developer, I bring a winning combination of experience and expertise to the table. With over two years in the industry, I've delivered web applications that consistently exceed user expectations, resulting in an increase in engagement. My solid academic foundation in computer science ensures a strong theoretical understanding, which I constantly update with the latest industry trends through ongoing learning. I'm not just a developer; I'm a proven performer who can elevate your frontend projects to new heights.

Skills

JavaScript • React • React router • Redux • Git • Sass/css • Github • Next.js

Work Experience

React Developer

self employed • Full-time

Remote

Technologies: React • Redux • Tailwind css • JavaScript • API

- develop user interfaces for web applications using React.js, ensuring high-quality, maintainable, and well-documented code.
- Create reusable UI components and libraries to streamline development and improve code maintainability.
- Implement state management solutions using Redux to manage application state efficiently.
- Integrate with back-end APIs and services to fetch and manipulate data, ensuring smooth data flow between the front end and back end.
- Ensure that web applications work consistently across different browsers and devices.
- Use version Git control systems to track changes, collaborate with team members, and manage codebase history.

Projects

Twitter Clone

Technologies: React • Redux • Tailwindcss • React router • Rest API

- This project is a Twitter clone that replicates some of the core features of the popular social media platform.
- It allows users to sign in, create tweets, view other users' profiles, comment on tweets, and more.
- The project is built using modern web development technologies.

Coffee Website

Technologies: React • Redux • React router • Tailwindcss • Bootstrap 5

- This is a Coffee Website built using React, React Router DOM, Bootstrap, Tailwind CSS, React Redux, and Redux Toolkit.
- The website allows users to browse a variety of coffee products, add them to their cart, remove products from the cart, and clear the entire cart.

Educations

frontend developer: frontend development

Frontend Bootcamp

alexandria, Egypt

- **Computer Science Fundamentals:** I developed a strong foundation in computer science principles, including algorithms, data structures, and problem-solving techniques, which form the backbone of effective software development.
- **HTML, CSS, SASS, and JavaScript:** I acquired proficiency in building and styling web pages using HTML and CSS, including advanced concepts like SASS for stylesheet preprocessing. I also became skilled in JavaScript, enabling me to create dynamic and interactive web applications.
- **React, Redux, and React Router:** I learned to leverage the power of React.js to build robust and modular user interfaces. Additionally, I gained experience in state management using Redux and implemented efficient client-side routing with React Router.
- **API Integration:** I developed expertise in integrating web applications with APIs, enabling me to fetch and manipulate data from various sources, enhancing the functionality and user experience of web applications.
- **CSS Frameworks:** I became proficient in using popular frontend frameworks like Tailwind CSS, Material-UI (MUI), and Bootstrap to streamline UI development, ensuring responsive and visually appealing designs.
- **Package Management and Version Control:** I mastered the use of npm for package management, ensuring efficient management of project dependencies. Additionally, I became proficient in using Git and GitHub for version control, enabling collaborative and organized development workflows.
